

Annual Review by D. C. Coleman, Chairman and President of C.P.R.

The Canadian Pacific greets 1946 as does every Canadian citizen, with the joy of anticipating that the past year saw the crowning of super-human effort with victory.

As late as every other Canadian, the Company is proud to have taken an active part in the achievement that united not only Canadians but all right thinking men and women throughout the world in the greatest co-operation for the common good that the world has ever seen.

Victory as too many surviving households know, was not bought cheaply in blood, in tears, or in treasure. And it now behooves all of us to see to it that the heavy price paid returns some measure of dividend in the form of maintained peace, balanced economic conditions and a continuance of unselfish co-operation in all our affairs.

The first steps towards such a goal have already been taken. Studies made while every soldier was striding in the prosecution of the war enabled the Canadian Pacific to start upon its wartime role as a social partner.

Records have been made in this machinery over which the records made in planning Canadian Pacific machinery on a wartime basis. At Ogden Shops, in Calgary, only 60 days were needed to transform the old into new industry into one of the most up-to-date assembly lines in locomotive shops in America.

I am proud to be able to state that Canadian Pacific men and women who have already returned from the services have brought with them new knowledge, new skills, new responsibility. As a representative cross-section of the 1,000,000 men and women who entered the Services they show that plans for the post-war Canada have been based upon a firm foundation.

Return of personnel, due to understandable reasons, has not been so rapid as a complete rehabilitation. Of 2,947 men and women who left the service, 3,317 had resumed duty with the company by the end of October, and the rate is improving each month.

In the years ahead, so long as we

Carbon Branch Canadian Legion Meets Monday

The Carbon branch of the Canadian Legion is holding a meeting in the Scout Hall on Monday, Jan. 21st at 8 p.m. and all veterans of both wars are invited to attend and may bring their wives or a friend. There will be a member or two of the Provincial Council to conduct the meeting and install the officers. They will also address the meeting on the aims and work of the Legion. A social evening will follow and ladies are asked to bring lunch.

Veterans please turn out as this is an important event in your lives as we must unite now and stand together.

Chas. Cayo, Secretary.

THE WORLD OF WHEAT

GOOD PROSPECTS FOR THE 1946 CROP

The precipitation which occurred over the prairies this fall has been harvest and freeze-up, for the three Prairie Provinces and weighted for wheat acreage, averaged 102 percent of normal, all according to the records from 700 Starline rain gauge stations. Fall moisture is stored in the ground for the use of next year's crop. Normal fall moisture is usually followed by an average 10 to 12 inches of snow, which is usually followed by a less than average yield for the next year, assuming, of course, that average rains fall during the growing season.

Of the past 15 years, 20 years had better than average moisture during the fall. In 22 of these 20 years a better than average fall moisture was produced. Altogether, then, the chance are in favor of an average yield for this next year, assuming, of course, that average rains fall during the growing season.

OFF THE RECORD

OTTAWA—Judging from the rate of \$2,000 award to the legislators in Canada's Parliament, it is likely that no longer to said that politicians are born, not paid.

BOY SCOUT NEWS

(By the S. M.)

Who wants the job of taking some boys on a hike? To any volunteer I might want you that Eddie Canning and Roy Kay are ever ready to push you into a snowbank and Dean Walsh is just as ready to laugh at you.

You should watch Gerald Kay and O'Hara Harmaning building a fire. They find that scuffling snow on the wood just prior to lighting is very helpful.

When a fire is just getting started, Dean is a great fellow to blow them out—at least he does not twice.

Eddie cooked some pork and beans, and, having forgotten a spoon, hid it in them into a cup and drink them.

Bill "The Conqueror" Harmaning has a wicked gleam in his eye and keeps me ever watchful. It is as much as a person's life is worth to be on a hike with him.

I now never to go on a hike with these boys again—until the next time.

AUTHOR-ACTOR

Bill "The Conqueror" Harmaning has a wicked gleam in his eye and keeps me ever watchful. It is as much as a person's life is worth to be on a hike with him.

I now never to go on a hike with these boys again—until the next time.

First-rate radio scripts are the regular product of author-actor TOMMY THIELS, pen. Best known for his talent in the radio comedy drama, he was the author of a Columbia, O.K. award-winning play, "The Last Year." At present, he is using in many of CBO's leading play productions, he is writing "Science in a Lab" broadcast over the CBO Dominion network on Mondays.

NEW CAR LICENSES READ ABOUT MARCH 15

New motor licenses for the 1946 year which opens on April 1 probably will be available around March 15, according to information which the Alberta Motor Association has received from the provincial authorities.

As the federal gasoline rationing system has been abandoned, there will not be the same amount of work involved in handling the motor licenses for the 1946 year. During the war period, the "AA" coupon books were issued at the same time that the provincial motor license was taken out. Consequently the issuing of licenses was undertaken earlier to take care of the extra work involved.

Provincial officials feel that there are prospects for many new motor licenses being taken out in the new year. People who laid up their cars during the war will be driving again and there are prospects of many new car owners, especially returned servicemen.

On the whole, prospects indicate that the 1946-47 year will be one to record a big gain in motor licenses in the province.

Farmers Protest Gas Price Increase

At the meeting held on January 7th, there were 24 members present. It was resolved to protest against the two cent raise in the price of gasoline and also that some action be taken on the issue of the local gas tax, also the provincial gas tax, also the car license fee.

Action was also taken to get about securing gasbooster pumps for the Carbon area this year. Canvassers for the Carbon district agricultural company was appointed and when these men or their helpers call upon farmers they will be able to get higher prices for implements. Canvassers are S. Canning, M. Hector and J. Barber.

The next meeting will be held on February 4th and we are trying to get Mr. Bell, district agricultural officer, to visit us and also to show pictures of interest to all farmers, so turn out and bring your wives to get their views to all meetings as their opinions are also needed for better living conditions.

Misses—Dear, did you notice that Mr. Jones has another new car? John (thinking fast) Yes, and if she was as attractive as you, honey, she wouldn't have to depend on military so much.

Wheatland School Division Annual Meeting

The annual meeting of Wheatland School Division No. 40 was held at the Wheatland school on Monday, Jan. 14th. The annual statement brought out the following: Cash on hand, Oct. 31, 1945, \$8,063.05. Total revenue, \$10,102.01. Total expenditure, \$1,817.50. Administrative expenses, \$1,071.90. Total expenditure, \$2,889.45.

Other expenses added to above such as insurance, health, transportation of pupils, interest, etc. bring total expenditures to \$2,889.45. While total expenditures to \$2,889.45, the total revenue brought out the following: Cash on hand, Oct. 31, 1945, \$8,063.05. Total revenue, \$10,102.01. Total expenditure, \$1,817.50. Administrative expenses, \$1,071.90. Total expenditure, \$2,889.45.

The superintendent reported that Carleton had the most modern and valuable building in the division. Several other schools in the division are interesting. Strathmore \$300,000; Acme \$29,217; Beiseker \$110,000.

Strathmore has the largest attendance, Beiseker is second, Acme third. The report did not include the percentage of students in each school satisfactorily passing their examinations. While this is not the ultimate object of education it is of interest to local taxpayers, who foot the bill.

TETANUS ANTITOXIN AVAILABLE

The Drumheller Municipal Hospital have advised that citizens of Carbon may be supplied with tetanus antitoxin at the rate of 50c per injection.

Anyone wishing to make use of this service should get in touch with Mr. B. P. Torrance at their earliest convenience.

INTERVIEWER

Interviewing guests and people who m to be the n-w is the assignment of reasonably GY MACK on the weekly broadcasts of "Canadian Cavalcade" over the CBO on Mondays. Behind Mack's easy pose and tact are years of singing and acting in British films, on the stage and in Canadian radio.

ACME JUNIORS SHUT OUT BEISEKER

Acme shutout Beiseker 2-0 at Beiseker recently in a high school hockey league game. Jack Greenway opened the scoring in the second period and Jack Brown scored the second. Acme won in the third period. It was the first shutout of the season for Tommy Korman in the Acme goal.

Wheatland School Division Annual Meeting

Swallow, Carleton, Strathmore, Acme, Beiseker, Havelock and Rockford are now in the Division, leaving only two points out—Standard and Breckana, which have two out of 25 pupils in attendance. There is 1,700 attending in the Division now.

Two new rooms were opened in 1945 at Beiseker by moving Lloyds building down there and one at Acme.

The health nurse, Patricia Morgan, stated in her report that each pupil given a health examination. Inoculations and vaccinations were given in school not previously immunized. Pre-school children were also similarly treated.

The superintendent reported that Carleton had the most modern and valuable building in the division. Several other schools in the division are interesting. Strathmore \$300,000; Acme \$29,217; Beiseker \$110,000.

COUPON CALENDAR

January 11—Sugar coupons 68 and 69; butter coupon 137; meat coupon 20.

Expire January 31—Preserves coupon 33-37, P coupons P1-P25, all unnumbered preserves coupons issued for special purposes.

Note—Sugar coupons 68 and 69 may also be used for preserves.

Carnival Draws Record Crowd

PROTEST INCREASE IN PRICE OF GASOLINE

Protests against the move to increase gasoline prices by two cents per gallon have been voiced by officers of the Alberta Motor Association. In different parts of the province, the proposal to boost prices has been criticized as being entirely unjustified particularly in Alberta which is Canada's largest oil producing region.

Provincial government officials and also officers of farm organizations have expressed their strong objection to any boost in the price of gasoline. Officials of tourist organizations also have joined their concern, particularly in view of the adverse effect higher gasoline prices would have on the tourist traffic from the U.S.

This year, tourist traffic is expected to reach a tremendous volume, providing there are no handicaps such as would result from higher fuel costs.

An investigation into the price of gasoline in the province will be urged when the session of the Alberta legislature opens in February.

Carbon Curlers At Swalwell 'Spies

Three risks of local curlers are attending the bonspiel at Swalwell this week. As all reports are in, the team is in good shape. It is reported that there are thirty risks participating. Personnel of the local rink are: S. J. Garrett, Syd Canning, Leo Hill, Reid, Leon Coates.

Wm. Rose, Frank Smith, Norman Nash, Archie McLeod, Jack Barber, Fred Desautel, Elsie Ross, Thos Dunlop.

HOCKEY SCHEDULE

Following is the schedule for the second half of the Big-Seven League:

JANUARY 20—Rockford at Trochu; Three Hills at Carbon.
JANUARY 23—Beiseker at Trochu; Three Hills at Rockford.
JANUARY 27—Three Hills at Trochu; Beiseker at Carbon.
JANUARY 30—Trochu at Rockford; Carbon at Three Hills.
FEBRUARY 3—Rockford at Beiseker; Carbon at Trochu.
FEBRUARY 6—Trochu at Three Hills; Carbon at Beiseker.
FEBRUARY 10—Rockford at Carbon; Three Hills at Beiseker.

Motor Cop—I've had my eye on you for a while now. Get out of my sight.

Co-Ed—And I thought you really wanted to give me a stick for speed.

The Importance of Planting Trees in Alberta

The Forestry Division of the Department of Lands and Mineral Resources emphasizes the importance of planting trees for shelter belts, windbreaks and windbreaks and also for the production of timber. Since the spring of 1952 many thousands of trees have been distributed throughout the province for the use of the public by the Alberta Forest Service and many agricultural areas have been benefited by this policy.

The results are becoming increasingly gratifying as the trees are growing and some are now showing protection against soil drifting, the high winds that are prevalent on the prairies and also in improving living conditions and beautifying the home surroundings.

Windbreaks planted on marginal and sub-marginal parts of the farm are proving very beneficial in providing shelter and in some cases all of the farm requirements for fuel, as well as of the lumber required from time to time on the farm.

At great many Bar and Red Oak trees have been distributed by the Alberta Forest Service in past years and these trees have proved to be a great part of the province.

A large number of Bar Oak and Red Oak are available for distribution in the spring of 1946 and it is suggested by the Service that each applicant include a number of these in their list, consideration.

The carnival sponsored by the Carbon Community Club held last Friday evening at the local rink was a success. Although a few more costumes, especially in the adult classes, would have improved the show, but all in all a good crowd enjoyed the two hours entertainment.

Prize winners were as follows—

RACES

Six years and under—Barrie Hunt, Vincent Adams.

Ten years and under—Miche O'Hanley.

Fifteen years and under—Bill Little, Dale Pason, Howard Hunt.

Gents open—Bill Little, Dale Pason, Howard Hunt.

Ladies open—Viola Patton, Irene Schmidt, Violet Patton, Irene Schmidt, Violet Patton, Irene Schmidt, Violet Patton, Irene Schmidt.

Girls, 15 and under—S. J. Garrett, Syd Canning, Leo Hill, Reid, Leon Coates.

Best dressed, ladies—Wm. Rose, Frank Smith, Norman Nash, Archie McLeod, Jack Barber, Fred Desautel, Elsie Ross, Thos Dunlop.

Best dressed, gents—S. J. Garrett, Syd Canning, Leo Hill, Reid, Leon Coates.

Agriculture Soundly Based in A Country Like Canada Is The Foundation Of National Progress

(By R. J. Deachman in Ottawa Journal)

A FEW days ago at the O.A.C., Guelph, I spoke to the second-year class in economics. Time being strange, I graduated from the O.A.C. in 1905. These boys will graduate in 1948. Forty years from that date they too may look back from my vantage point. It will then be close to the end of another century. Will the view be clearer, the prospects brighter, or will they again be living in the shadow of war?

History alone can tell and history is always written by the survivors. All we can do is wish them well and give them all the help we can while we linger along the way.

What are these boys thinking about? Few, I imagine, have followed the somewhat common cult that man will soon abolish toil, that the state will do everything, feed the cattle, milk the cows, take care of the milk, market it and guarantee prices far beyond the dreams of war.

In agriculture, there is a close relationship between the farmer and the cow. The cow must be milked before the milk is sold. The position of the farmer will not be improved by shortening hours. If the farmer worked thirty hours a week the price of the products produced would rise to the point at which demand would be reduced to the point of no demand, no prosperity. The world needs more efficient production, not higher prices.

So farm boys, in studying economics at the O.A.C. are cold, calm analysts. The thing they want to discuss in regard to the future here directly upon cost of production, markets, more efficient ways of doing things.

Their interest in farm machinery is not surprising. During the latter part of the 19th century, when this continent was scarce, new farming areas were opening up. Machine tools were provided to the farmer to make the land more fertile. Capital, seeking a market for its investments, sought a market for its investments. I had a long program of changes—how the credit to the farmer was the reaper to the binder, from the binder to the combine—changes are still taking place. The farmer is not taking place. The farmer is not taking place. The farmer is not taking place.

The other factor is the need for new machines, new methods. In a competitive economy we cannot afford to stand still. The farmer must be able to produce more. The farmer must be able to produce more. The farmer must be able to produce more.

The big problem before agriculture is markets and this is tied up with the present unsettled condition of the world. This is a condition which normally follows war. In the recent years the destruction has been greater than in all the wars of the past 200 years. National passion has been aroused, they will pass slowly. Now in modern history has the world been so hungry as it is today. Normal methods of exchange have been destroyed by the inability of nations to produce. These things hamper recovery.

On the other hand it may be said that recovery may be quite rapid. There are, however, obvious restrictions. Men are unwilling to go back to their old jobs. They search for easier tasks—more pay. This may hamper temporarily the prospects of recovery.

We fight against poverty. Science teaches us to reduce the amount of work necessary to accomplish a purpose. In other words it should be possible for a man to secure a motor car now than it has at any other period in the past, but the price of cars is likely to go higher. With modern equipment we ought to be able to build homes with less effort, that is, less cost, than ever before, but the price of homes has risen and the people begin to doubt their ability to own one. There is a reason. For here near the minds of our citizens have been concentrated on war. Think of the marvels which have been accomplished to bring us victory. Doubt not that greater miracles in peace-time will be wrought. In these, agriculture will have a share—there, is the hope of it.

AGRICULTURE IN CANADA has fought a hard fight, remains to be seen. The terrain is not so favorable for victory. Agriculture is receiving more consideration. There is a growing conviction that the fact that agriculture soundly based in a country like Canada is the foundation of national progress.

The Egyptians and Syrians were using glass as a glaze for vessels 5,000 years ago. 2651

One-Woman Canteen

Mrs. Allison Held Open House in Vancouver Throughout War

Mrs. May Allison, Vancouver's one-woman canteen, probably has the biggest family in the world—nine daughters and some 1,102 sons.

Of course, only two of the boys actually belong to her family. The other 1,100 have just adopted themselves into the friendly circle.

Living in a modest home in Vancouver, Mrs. Allison has been the heart of the city. Mrs. Allison has been the heart of the city. Mrs. Allison has been the heart of the city.

More than 1,000 boys, of all creeds and colors, and wearing the uniforms of Canadian and Allied services, have entered this friendly home and stayed in, danced, wrote letters, played games, and read the radio and eat roughly 10,000 meals since 1941.

It all started on Oct. 8, 1941, when Mrs. Allison's son, Jim, enlisted and joined a friend, Cpl. F. H. Bennett, to enter the service.

Soon the Knights of Columbus, the Canadian Legion, the Canadian Naval Barracks were turning in some 1,000 boys a day. Mrs. Allison's home was a place where they could rest and put another patch at the table.

The first month she didn't keep track of all the visitors. Then some suggested she keep a list. It was more than 1,000 names in it.

"They were from all branches of the services and they were all kinds of uniforms but I never saw any fiction in my home," Mrs. Allison says.

"They were all colors, too, but I never saw a single prejudice."

One day they were a fine bunch of boys all round. I've never had a day in my home. Mrs. Allison says.

We've entertained the lads without drinking parties or anything of that kind. Christmas day 1944 there were 30 pairs of heavy service boots pushed under the door.

The postman struggled up to her door with 300 cards from his "adopted sons."

Last Christmas Day "Ma Allison" received 140 remembrances from service men.

Queen's House, in Cheyne Walk, where Bessie held her court of Pre-Raphaelites is still there with its beautiful gates and tall gate-pilars, and the house is still the same neighborhood. Whistler's "White House" and Lindsey House, where he painted many pictures.

Thackeray's houses in Young Street, Kensington, and in Kensington Palace Gardens have survived, but that characteristic small, shabby brick house, the White House, of Fleet Street, where Goldsmith lodged, was destroyed. Lamb's birthplace in the Temple, like many other literary and legal shrines in that historic precinct of the law, is now decayed and abandoned.

LARGELY DEPOPULATED
A Warsaw dispatch to the Polish Press Agency says that according to some 800,000 inhabitants of the city, the German occupation in 1939 by the Germans. Warsaw's pre-war population was 1,300,000. It is now 650,000.

FOR ANCIENT WORSHIP
The Zoroastrians of ancient Persia built their temples around natural fire, and what is more, they had oil fields, and thus obtained the eternal fires which they worshipped.

Canadian Navy

R.C.N. Will Be Out Of European War Theatre By April 1

The Royal Canadian Navy will be out of the European war theatre by April 1.

The Army and the R.C.A.F. have occupational duties on the continent but the Navy's work is through Canadian minesweepers which had been working around the British coast since home in October.

The new destroyer Cruiser, commissioned at Belfast Jan. 24, H.M.S. Panther, lent-lease aircraft carrier named by Canadians has been carrying personnel of the three services between the Clyde and Halifax but she will make her last trip soon before being returned to the United States.

From an overseas strength of 20,000 at the end of the war, the United Kingdom establishment has been reduced to less than 1,000 and men are going back to Canada at the rate of 300 or 400 a month.

Among personnel remaining are the crew of the aircraft carrier Panther, to be commissioned at Belfast Jan. 24, H.M.S. Panther, lent-lease aircraft carrier named by Canadians has been carrying personnel of the three services between the Clyde and Halifax but she will make her last trip soon before being returned to the United States.

TESTIFIES AGAINST SEVEN JAPS—Sister Pat San Buenaventura was the first witness called by the prosecution in the trial of seven Japs in Manila for the slaying of two U.S. airmen and five Filipinos. The trial was in the same building where Jap Gen. Yamaba was tried.

A Giant Deception
Secret Of How Rubber Ships Fooled Huns Is Disclosed

One of the closest guarded secrets of the war—the part rubber tappers played in Allied "illusionary warfare"—was unveiled by the United States War Department.

A giant deception caused the Germans, just before D-day, to see flights of invasion craft that didn't exist, loaded with weapons that were forged and pointed for attacks that never were planned.

Inventor, craft, equipment with armament, and landing craft and barges carrying tanks, field artillery and other combat equipment, appeared and disappeared overnight in great numbers along the English Channel coast in the days preceding June 6, 1944—much to the confusion of German observers and the High Command.

The rule was made possible by speedy production, under highest priorities of pneumatic balloon-fabric models of the craft and equipment required for this vast deception operation.

The decoys were made with the same fabrics and skills that in peacetime had produced gargantuan tops for parades. They were carried from port to port, deflated and blown up when according to decoys.

When used as archeologists, people first began setting in the district around Rome some time around the year 1000 B.C.

MADE BY GERMANS
The first assignment of toys made for British war orphans by German prisoners of war in England arrived recently in London from Camp, Cornwall, Edinburgh, Scotland.

Much Being Used
Dr. Best Sees No Sign Of Insulin Within Twelve Years

An acute shortage of insulin may develop "within the next dozen years," Dr. C. H. Best, co-discoverer of insulin with the late Sir Frederick Banting, told the student body of the Ontario Agricultural College at Guelph.

"There has been a steep rise in the use of insulin," said Dr. Best. "In this country we no longer have an endless source of pancreas (glands from which insulin is extracted). Pancreas should be salvaged from the hundreds of small slaughter houses across the country. They can be stored and kept until they are needed."

"During the war years there was no insulin for the diabetic children of Europe. With peace the demand of distribution will increase the demand and strain the supply."

THE GREAT CLOCK
The clock of life is wound but once. And no man has the power To tell just when the hand will stop. At life or death's hour.

Now is the only time you will; Live, love, toil with a will; For man's faith in tomorrow For the clock may then be still.

Wear today a cheerful face In everything you do; The sunshine that you radiate Will shine right back to you.

Speak today a word of hope To someone in distress; You may lift up another's load You may make his burdens less.

Do today a gracious deed And do it with a smile; A little daily acts like these That make your life worthwhile.

—PENNSYLVANIA GAME SHOW

HISTORY OF WAR
TOKYO.—All Japanese-language newspapers and many magazines are publishing a series of 20 factual articles on the Pacific war, prepared by information and education officers of the MacArthur staff. Headquarters said there had been numerous inquiries from Japanese for an Allied history of the war.

Canadian Engineers Produced Radar Equipment Guided Only By Scale Photographs

CANADIAN engineers, guided only by scale photographs, produced radar equipment three months ahead of plants which had the original blueprint as a guide. G. K. Shields, deputy minister of the Munitions Department, disclosed, in an address prepared for delivery to the Montreal Canadian club, reviewed Canada's war production record and placed new light on the Dominion's top performance in the radar field.

Radar did more than even the atomic bomb to win the war. For some time after the United States had entered the war Canadian-built radar equipment guarded approaches to the vital Panama Canal and to other important North American points.

Other Canadian-made sets made possible the north African landing, helped smash the Italian navy, kept watch over the Atlantic and Mediterranean and helped to win the battle of Germany.

The story of Canadian radar manufacture dated back to 1938 when the Department of Defense and the National Research Council started taking an interest in the then highly secret development. Attempts were made to obtain models from the United Kingdom, but by that time all available supplies were needed there and by 1940 Britain turned to the United States for additional production.

A group of British experts was sent to the United States to arrange for production and en route they passed in Canada, but they told Canadian engineers they could not produce their blueprints.

"Our engineers were not easily daunted," said Mr. Shields. "With nothing but scale photographs to assist them they got on and produced radar—and they did it."

For their reverend credit and to the credit of the workers who co-operated so wholeheartedly in the project, the Canadian Research Enterprises Ltd., at Lindsay, Ont., without the original blueprint, turned out its first radar set three months ahead of the factories which had the blueprints.

However, Canada's contribution was not restricted to radar. Shortly after the outbreak of the war, Canada supplied the United States for weapons, but the first transports to reach China carried the slogan "Made in Canada" and held Bren guns and ammunition produced in Ontario and Quebec plants.

A Kitchen Hint
Tells How To Provide Butter Flavor

Without Much Butter

The shortage which makes it impossible to use a lavish hand with butter got the agriculture department home economists busy devising substitutes and they have emerged from their kitchen with the suggestion that buttered bread crumbs be used in place of butter.

It provides butter flavor without much butter.

Melt a half tablespoon of butter and add half a cup of fine, dry bread crumbs. Stir over low heat until the crumbs are well coated. Sprinkle over the cooked vegetables.

BREWING INDUSTRY OF ALBERTAITEMS OF INTEREST IN THE
WORLD OF FOODSTUFFS

France complains of lack of motive and it appears that the acreage to wheat will be comparatively small. The total output of cereal grains in Denmark in 1945 is officially estimated at about three percent less than a year ago. Rice losses accounted for most of the reduction.

Spain and Portugal report abundant rainfall; the crop outlook is much more favorable than it was a year ago. The Australian wheat harvest is progressing rapidly under very favorable weather conditions.

OFF THE RECORD

OTTAWA—It is reported in Ottawa that there are now an unusually large number of applications for divorce in this initial postwar period. It seems that an unusually large number of young people did get married during the wartime "boom", believing that "marriage is made in heaven", but now as the "boom" is passing away they have come down to earth!

BEAN PRICES
ARE REVISED

OTTAWA—Canadian price ceilings on imported beans and kidney beans will now be based on U.S. ceilings plus transportation costs plus the usual mark-up allowed the trade. The Prices Board announces. The revised prices will facilitate movement of these beans into Canada at a time when unfavorable weather reduced the Canadian white bean crop and demand increased, a spokesman for the Board stated.

TRY A CLASSIFIED AD. 50 cents.

SHOWMAN

Ease and adaptability in multiple character interpretation has kept radio actor ALAN PEARCE before the microphones in CBC's "Toronto studios. One of the regular members of The Johnny Home Show cast Fridays, Pearce has been in radio since 1938.

TIRE RIMMERS
WON'T GET OFF

In fairness to the thousands who scrupulously observed the ration regulations, pending prosecutions involving black marketing of tires and other offences will not be abandoned, state enforcement officials of the Prices Board.

When a woman goes on a drastic diet, she has one or both of two objectives on her mind, to regain her girlish lure or retain her boyish husband.

CEILING PRICES
ON TIRES HOLD

OTTAWA—Removal of tire rationing and distribution restrictions does not affect the prices of new or used tires for cars or trucks. The Prices Board reminds. "The same schedule of prices at which tires could be sold during the fall of 1945 is the authorized maximum today," a Prices Board spokesman stated. Maximum prices set for new and used tires, retreading services and repairs to tires and tubes and replacement guarantees have also been confirmed.

Truckers buying in wholesale quantities and large users buying for fleets of trucks and commercial vehicles are also allowed discounts on the same scale as in the basic period.

Does 'you' take this woman for a hugely wealthy wife? asked the colored person, glancing at the diminutive, watery-eyed, bowlegged bridegroom, who stood beside 210 pounds of feminine insurance.
Ah, takes nothing, responded the bridegroom. Ah's belt's tooked.BOARD CHECKS
CLOTHING PRICE

Minimum retail markups and maximum costs for garments cut, made and trimmed by a manufacturer for a retailer who supplies the cloth have been established by the Prices Board. The order is designed to curb price abuses in such instances.

OFF THE RECORD

OTTAWA—It has been expressed well by a wit along Parliament Hill that it is not surprising that there are so many shortages of necessities across Canada at the present time since with many people what were luxuries before the war are now all necessities!

An industrious gentleman in the museum was raising vigorously at a huge oil painting of a shapely girl dressed in only a few strategically arranged leaves. The title of the picture was "Spring." Suddenly the voice of his wife snapped. Well, what are you waiting for, Autumn?

WORLD HAPPENINGS
BRIEFLY TOLD

There will be no women's division in either the interim or permanent Royal Canadian Air Force, it was disclosed in Ottawa.

Speed-up in the British telephone service is anticipated from the release of 1,100 military operators from the Army and civil defense exchanges.

The French government has appealed to the United States to increase its shipments of wheat and keep bread unrationed in France.

Mayor R. H. Saunders has reported that 5,107 persons, 665 of them women, had been apprehended in Toronto for drunkenness from Jan. 1 to Sept. 30.

Ships partly made of plastic material will be on sale in British shops early in 1946, it was announced at headquarters of the footwear controller.

New battleships, aircraft carriers and cruisers, submarines, destroyers and smaller warships for the Royal fleet are being designed by Soviet shipbuilders.

Consumption of "fitter" food—fats, proteins and vitamins—has increased by 58 per cent. in the United Kingdom during the current year, said a report issued by the Ministry of Food, London.

One of history's great land shuffles has been completed in Soviet-occupied Germany where 7,000 large estates belonging to Junkers and other big owners have been parcelled out to 281,150 small farmers.

Britain's Farm Army

Effort Made To Increase Food Production Was Vast

When future historians assess the United Nations' victory over their enemies in the Second World War, attention will be made of Britain's all-out effort to increase food production. At a time when submarine warfare on the rampage and shipping space was a vital matter, British farmers accomplished a near-miracle. In 1939, though agriculture was Britain's greatest industry, the United Kingdom imported 60 per cent. of the food it consumed. In that year the cultivated area, including crop land and grazing areas, was about 32 million acres, of which some 13 million acres were tillage. In 1944 the land in crops was nearly 18 million acres.

At the beginning of the war the Ministry of Agriculture was empowered to set up sixty-two County War Agricultural Executive Committees which had compulsory powers in determining the use of land. Priority was given to the production of milk, wheat, oats, potatoes and sugar beets. By 1944, in spite of vexing shortages of manpower, fertilizers and machinery, Britain was raising 70 per cent. of its food.

Britain's record for wartime food production was an outstanding achievement and played a large role in keeping most of the 18 million acres in production. The war taught the lesson that food is as essential as any other item in maintaining national strength.—New York Times.

Message In A Bottle

Navy Man Gets Reply From Northern Ireland

Mr. McIntyre, son of Mr. and Mrs. Raymond E. McIntyre, while serving in the Canadian Navy, cast overboard 200 miles off the north coast of Norway, a bottle in which he had placed a brief message bearing his name and address. His ship was returning from the Russian port of Murmansk in February of this year when the bobbing bottle started out on its journey.

Recently returned home, Roy has received a letter from Belfast, Ireland, dated August 27, 1945, from Post Quigley, stating that the writer had picked up the bottle August 17 on the short coast two miles east of Portrush, County Antrim, Northern Ireland.

COULD BE WORSE

"The little church was full, but the marriage ceremony seemed in danger of being stopped, for the bridegroom was deaf and could not hear the important question: 'Will you have this woman for thy lawful wedded wife?'"

"Oh," said the deaf man. "The clergyman raised his voice: 'Will you have this woman for thy lawful wedded wife?'"

"This seemed to answer the bridegroom."

"Oh, I don't know," he said, "she told me so awful. I've seen worse than her that didn't have half as much money."

LED SHELTERED LIFE

Until she became a queen, Victoria never slept a night away from her mother's room and was not allowed to converse with any grown-up person, friend, tutor or servant, while out her mother or grandmother present.

One of the oldest flowers in cultivation is the pansy which belongs to the violet family. 2601

Group B	left-over	unrationed	Group C	Group D	unrationed	Group D
3 lbs. 2 coupons			1 lb. 4 tokens	2 lbs. 6 tokens		1 lb. 3 tokens

3 tokens to carry over, never change for Sunday meal.

It is possible to have roasts under meat rationing? Of course. The family of four with four meat coupons to spend each week can start on Sunday with a three-pound roast of veal requiring only two coupons. Let's have a good dressing and plenty of tasty brown gravy to accompany it. Enough will remain to combine with potatoes, green vegetables and a good cream sauce, to serve short-coupled biscuits on Monday. For Tuesday fish might well provide the protein, with the meal that keeps your ration fashion in line with the meatless day observance in restaurants.

Materials Scarce

Buying Home Furnishings in Britain Is Hard Job

It is the poor newworlders of Britain. Paraphrasing their first home—if they can find one—provides little fun and excitement. It is all hard work getting permits to buy and then tramping from shop to shop in search of bare necessities.

To decorate their flat they may spend £10 (£45) without a license. If the job will cost more than that, they must apply to the Borough Council which sends around an inspector to see the plan and the amount is justified. That settled, there is the problem of finding a decorator, and even the choice of colors is limited.

New materials, except for the utility type, is not being made or imported into Britain. Used furniture, except in antique shops, is price-controlled, but the price is high. A dining-room suite may cost £200 (£800), a bedroom suite from £150 up, and two armchairs and a settee about £110.

Utility furniture conforms with wartime necessity for economy in materials and labor and no one recommends it for long or hard wear. The style is simple and the range of design small. The idea is to produce necessary articles at a reasonable price and there is no purchase tax. But the wood used is price-controlled, but the price is high. A dining-room suite may cost £200 (£800), a bedroom suite from £150 up, and two armchairs and a settee about £110.

Plenty Of Work

But Scarcity Of Selected Jobs Says Department Of Labor

The Dominion Department of Labor is advertising for 3,000 hushmen for sheep, dogs and pulpwood.

Northern Ontario dispatch says that in one mining area alone there is a shortage of 2,000 workers.

A British Columbia news item tells of a shortage of both mining and lumber workers.

What this seems to mean is that when people talk about a current scarcity of jobs they mean scarcity of selected jobs. A scarcity of the sort work people would like to get if they could get it.

Well, there never has been a time in the worker's history when there was work for everybody at the sort of work everybody wanted, and there never will be. Indeed, in such a world economic and social life would break down. There would be nobody to do the hard, disagreeable work essential to existence.

We can't all choose the posts in life that we would like, even though we may think we could find them better than those who have them; can't all crowd the far-away pastures that look green. Instead, in a world where most of us have to earn our living by the sweat of our brow we must be content with our appointed tasks, realizing that life is a procession of second-best choices and that the jobs they like, or a home for ourselves and our dependents being what it is, any work is better than "fall days."

We hear much these days about "fall days." That is, a home for everybody at the sort of work everybody wanted, and there never will be. Indeed, in such a world economic and social life would break down. There would be nobody to do the hard, disagreeable work essential to existence.

Overcame Handicap

What One Veteran Has Done In Matter Of Rehabilitation

Members of the War Amputations Club in Toronto point to Carley Christian as prime example of what an amputated veteran can do in matters of rehabilitation.

Almost blind to bits at Vimy Ridge 28 years ago, Christian survived to emerge from Bayville Hospital, Toronto, in 1919 without arms or legs.

Despite his handicap Christian became a successful salesman with his retirement a short while ago. He is able to care for himself without aid and was described as "about the frailest parent at the train" when his only son returned home recently from three years in the navy.

Chief requisites in overcoming obstacles, Christian says, are learning to disregard public curiosity and acquiring confidence and the will to do a thing.

A descendant of Fletcher Christian, hero of the Bounty mutiny, he is an enthusiastic supporter of the present campaign of the amputations' club to build a new and better-equipped clubhouse.

REG'LAR FELLERS—Joe Miller Expert

RUSSIA BUYS ELECTRICAL EQUIPMENT HERE—Russia has placed a \$3,000,000 order with a Hamilton, Ont., firm for rectifiers to convert A.C. power to D.C., and other electrical equipment to be used in a huge aluminum plant to be constructed somewhere in the Soviet Union. Firms in other Canadian cities also are to get Soviet orders. To replace generators of the Enigma power dam which were destroyed in the war, Russia is purchasing three huge hydro-electric generators at Schenectady, N.Y. One of them is here in the process of construction.

Master Plan

Britain's Housing

Would Set Up An International Police Force To Control Weapons—Herbert Morrison, Lord President of the Council, has pledged Britain's Labor Government to provide a master plan for scientists and experts of every kind. The New York Times reported in a special dispatch from London.

According to the Times dispatch, the new Commonwealth Society's committee suggested that Britain, the United States and Canada invite other nations to join in setting up an international police force to handle all super-weapons of mass destruction.

Winston Churchill, Conservative party and Opposition leader, is president of the British section of the new Commonwealth Society and Prime Minister Attlee is a vice-president. The Times said it did not know whether they supported the suggestion.

Sweden, Not Canada, Supplying Britain With Timber Homes—Unless present plans are changed, Britain will import no prefabricated houses from Canada as part of the Government's housing program, it was learned at London.

Plans to bring prefabricated dwellings from the Dominion were given "sympathetic consideration at one time," it was said at the Ministry of Works, but they were abandoned because of shipping difficulties, fear of breakages in transit, and the general unpopularity of timber houses in Britain.

"There is such a small demand for timber houses in the United Kingdom that supplies from the nearest source—Europe—will more than meet the demand," a Ministry official said. "Sweden is supplying about 5,000 which will be used in Scotland."

At the same time he admitted that when Government restrictions on building are lifted, probably within a year's time, private builders may seek supplies from Canada. However, it was thought the demand would be for factories such as kitchen units, tables and drainboards.

The Ministry had no official comment to make on reports that a large order for prefabricated materials already had been placed in Canada. It was intimated that a statement might be issued at a later date to clarify the situation, but the spokesman preferred to knowledge of the deal.

Britain herself is producing prefabricated houses and will step up output to meet additional demands created by the decision of some northern cities to refuse to erect any more of the type imported from the United States.

PRICES GO UP FOR BROOMS

Removal of the import subsidy
paid on broom corn since the beginning
of price control will result in an
increase in the consumer price of
brooms, according to a Prices Board
announcement. The price increase
approximately 25 cents for smaller
brooms and 42 cents for the larger
more expensive type, will offset the
additional cost of corn broom to the
manufacturer. Only quality specifica-
tions still govern the manufacture of
brooms.

CANNED POULTRY PRICES INCREASE

Increases in the price of canned
poultry are now allowed because gen-
erally higher prices on poultry used
for canning have prevailed since most
rationing was imposed last fall. The
Prices Board announced. Prior to
that time poultry used for canning
had been selling under price ceilings.
The increase to the consumer will
vary between nine and eleven cents
per pound for products, such as can-
ned chicken. Increases for other types
of canned poultry will vary according
to quality.

NEW CHEVROLET ON DISPLAY

Garrett Motors have a new 1940
Chevrolet car on display. Call in and
look it over next time you are in town.
It's not for sale—yet.

Old Archie Says—

Old Doc Hay was working again.
Pulled another, and, by golly, another.
Whoopee, he did it again.Heard a man say he was butchering
his cattle to keep them from starving
to death. Don't think they had much
choice.Seeing Tom Lang on a saddle horse
seemed like old times.The high cost of living is only a
joke. It's the high cost of living that
keeps the boys broke.Income taxes were so high during
the war that one could not afford to
make a living.Wonder if Annie Aircraft is Uncle
Sam's wife?

CLASSIFIED

FOR SALE—School pony, 1000
lbs. Will broke to drive or ride. Also
